DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species 1: Corresponding to claims 1-11, 17, 30-32 (figure 3)

Species 2: Corresponding to claims 12-16, 18-29, 33-34 (figure 7)

The species are independent or distinct because for example species 2 requires “generating a m^{th} regional training set for codevector training comprising the plurality of data vectors of the m^{th} regional data set and data vectors of a data subset adjacent to the m^{th} regional data set of the $m-1^{\text{th}}$ regional data set”, and, further the difference between species is evident from the paragraph [0013] of the specification where two different embodiments referring to these species are described.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no claim that is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
